

## Worm World [5+]

Look inside the fascinating world of worms with this fun and informative kit. Watch your worms mix up the different coloured layers in their chamber and feed them leaves.

Children of all ages will enjoy observing the earthworms as they go about their essential daily business. A great opportunity to learn more about worms' importance in our ecosystem. Children are encouraged to collect their own worms and told how to in the instruction manual.

## Kitchen Science [8+]

Perform amazing experiments with everyday materials. A fun kit filled with inspiration. Contains 6 specially designed kitchen science experiments. Generate electricity by using a fork and tomato and light up a bulb. Launch a rocket fuelled by baking soda.

*Contents:* Vinegar Rocket, launcher pad, small spoon, volcano blister, 2 skewers, finger print black sheet, 8 finger print record sheets, brush, 8 secret message sheet, 2 zinc plates, wire, LCD watch and detailed instructions with science explanations and fun facts. Materials required from home kitchen: vinegar, baking soda, red food coloring, washing up liquid, measuring cup, sugar, cloth pegs, teaspoon, forks, corn starch, black currant/grape juice concentrate, lemon. Ask for adults permission and assistance in getting these materials for the experiments.

## Magnet Science [8+]

Contains a super magnet set that could be transformed to perform 10 fun experiments and games. Make a super power horse shoe magnet or a magnet wand. Construct a super magnet racer, a yacht compass or a mysterious dangler.

*Contents:* Contains 2 super power bar magnets, 2 ring magnets, 1 set magnet handle (can be assembled into magnet wand or U shaped magnet), 1 car/boat chassis, 4 wheels, 1 long axle, 1 short axle, 1 rod for fishing wand/yacht mast, 1 fishing wand joint, 2 ring magnet joints, 5 magnetic fish, 15 metal screw nuts, 1 roll of thread, detailed assembly and game instructions with fun facts and principles of magnetism.

### Glow in the Dark Solar System Mobile [6+]

Bring home the heavens with this glow in the dark solar system in a box. Hangs from your ceiling. Anyone into planet watching will love this personal planetarium. This set includes a bright, glowing sun, as well as the eight planets that complete the solar system plus Pluto.

The sun and planets come with hangers, and the kit includes 32 feet of clear plastic line to hang the solar system from the ceiling and a solar system guide. Bring the universe to your fingertips with the flip of a switch with Glow-in-the-Dark Solar System from Educational Insights.

#### Sample sizes:

Jupiter - 7 cm    Saturn - 5 cm    Mars - 2 cm

### Crystal Growing Kit [10+]

An astonishing way to see science in action. Grow your colourful crystal in the container provided. It's a fun sparkling chemistry experiment.

Learn about saturated solutions, how particles in water behave and the formation of crystals. Colours may vary. Children must be supervised by an adult.

### Weird Slime Laboratory [10+]

Create ghastly blood clots and exploding slugs, grow gruesome tapeworms, and shock your family with fart-putty and bouncing do-dos, all by the magic of chemistry! Discover fascinating slimy secrets and the science of polymers. Make 'tadpole soup', 'slimy snot', and much more! Each kit contains enough material for the experiments to be repeated several times. Designed to have great play value while exploring fascinating scientific principles.

*Contents:* Alginate, Calcium Chloride, Sublime slime powder, Red food dye, Green food dye, Protective gloves, goggles & mask, measuring beakers & storage jars, Lab pipettes, Stirring sticks, Specimen tubes, Dish, Workbench, Colour instruction booklet.
